

## Integration

PayNet offers flexible API integration options, allowing you to choose between a **PayNet-hosted page** or a **self-hosted page with customized design**. Both options cater to your preferred payment journey. Explore into our API explorer page for a detailed overview of our solutions.

**PayNet-hosted page**   [Self-hosted page](#)

---

PayNet manages the payment journey to offer users a seamless checkout experience and expedite integration for market launch. Utilising PayNet's hosted page simplifies integration, ensuring a consistent user experience across various platforms and it takes care of the complexities by managing the list of banks/e-wallets throughout the checkout process. Simply redirect to PayNet, and we'll handle the rest for you.

### **One Time Payment**

This is the API that allows Acquirer to facilitate one-time payment via DuitNow Online Banking/Wallets.
