

HTTP Status Codes

All HTTP response status codes are separated into five classes or categories :

- **1xx** informational response – the request was received, continuing process
- **2xx** successful – the request was successfully received, understood, and accepted
- **3xx** redirection – further action needs to be taken in order to complete the request
- **4xx** client error – the request contains bad syntax or cannot be fulfilled
- **5xx** server error – the server failed to fulfil an apparently valid request

INFO

Different product may implement different response and status code. Please refer to the respective API product reference to learn more on the specification.
