

Get Bank List

This API serves as the initial gateway for accessing the roster of issuing participants that endorse DuitNow Online Banking/Wallets or DuitNow Consent. Upon invoking this endpoint, the response furnishes information regarding bank details, status, and redirection mechanisms. Subsequently, payers are seamlessly redirected to their chosen issuing participants for authentication, ensuring a smooth and secure authentication process.

Process Flow

Request

GET /v2/bw/banks

Response

Data Object			
retail / corporate Object			
bicCode	String	Max length: 35	Required
Bank Identification Code (BIC) of the acquirer.			
name	String	Max length: 35	Required
Name of issuing participant.			
browser	String	Max length: 140	Required
Browser information and version.			
androidAppId	String	Max length: 140	Required
Application identifier for Android platform.			
iosAppId	String	Max length: 140	Required

Application identifier for iOS platform.			
url	String	Max length: 140	Required
Bank URL to be redirected.			
isConsent	Boolean	Max length: 5	Required
<p>To notify if issuing participant support DuitNow Consent:</p> <p>isConsent = true, the issuing bank is currently supporting DuitNow Consent.</p> <p>isConsent = false, the issuing bank is currently not supporting DuitNow Consent.</p>			
isActive	Boolean	Max length: 5	Required
<p>To notify if issuing participant is active in production:</p> <p>isActive = true, the issuing participant is active.</p> <p>isActive = false, the issuing participant is inactive.</p>			
isFpx	Boolean	Max length: 5	Required
<p>To notify if issuing participant supporting FPX:</p> <p>isFpx = true, the issuing bank is currently with FPX.</p> <p>isFpx = false, the issuing bank is not with FPX.</p>			
isBank	Boolean	Max length: 5	Required
To notify if issuing participant is bank or non-bank financial institution:			

<p>isBank = true, the issuing participant is a bank. isBank = false, the issuing participant is e-wallet.</p>			
isObw	Boolean	Max length: 5	Required
<p>To notify if issuing participant supporting DuitNow Online Banking/Wallets:</p> <p>isObw = true, the issuing bank is currently with DuitNow Online Banking/Wallets. isObw = false, the issuing bank is not with DuitNow Online Banking/Wallets.</p>			
priority	Integer	Max length: 9999	Optional
<p>The sequence to sort the issuer. The lower the number, the higher the priority. If the value is 0, suggest to sort by alphabetical order.</p>			
End retail / corporate Object			
End Data Object			
message	String	Max length: 1024	Required
<p>Refer to the reason codes in the appendix.</p>			

Sample Response:

```

}
```

(i) IMPORTANT NOTE:

This API will respond with a list of banks, including FPX banks (until the end of 2024) and RPP banks, along with the supported RPP services. The acquirer should prioritize the order as follows:

One-Time Payment **Save Payment**

- isActive = true
- isBank = true
- isObw = true
- isFpx = true

Note:

Prioritize listing the bank if isObw = true. If not, list the FPX bank if isFpx = true. Only one type of bank should be listed, not both.
