Enquire Checkout Details

In case the:

- Payment Status webhook in **Initiate Payment Intent (One-Time Payment)** and **Initiate Checkout**

- or Update Consent Details webhook in **Initiate Payment Intent (Save Payment Method)** and **Initiate Consent**

fails to receive, leverage this endpoint to retrieve the details that previously created during checkout. Utilize the 'endToEndId' parameter as part of the response in this API to fetch the checkout ID, enabling you to inquire about the payment status through the **Payment Status** or **Payment Method Status**.

Process Flow

Step	Sender	Receiver	Process
1	Acquirer	API Gateway	Acquirer initiates an enquiry via endToEndId for the checkout details.
2	API Gateway	Acquirer	API Gateway will locate the checkout details and response back to acquirer.

Request

GET /v1/bw/checkout?endToEndId= 20240724M00370918610BW05004745

Response

Below is the request if the endToEndId belongs to one-time payment.

Data Object			
checkoutId	String	Max length: 36	Required
The unique external identifier (uuid v4) provided by the acquirer to PayNet.			
rtpEndToEndId	String	Max length: 35	Required
Unique message identification from RPP. This can be used to reconcile with RPP BackOffice or Reports.			

issuer	String	Max length: 100	Required
Name of payer's issuing bank / wallet.			
paymentMethod	String	Max length: 35	Required
Payer selected payment method: 01 - DuitNow Online Banking / Wallets			
`End Data Object`			
message	String	Max length: 1024	Required
Response with "OK" if successful. Otherwise, please refer to the **reason codes** in the appendix.			

Sample Response:

```json
{
    "data": {
        "checkoutId": "a7e2ed2a-b088-4495-8cf4-88da08f644f2",
        "rtpEndToEndId": "20240325M00002018610BW00618197",
        "issuer": "Affin Bank",
        "paymentMethod": "01"
    },
```

```
        "message": "OK"
}
```

Response

Below is the request if the endToEndId belongs to save payment method.

Data Object			
checkoutId	String	Max length: 36	Required
The unique external identifier (uuid v4) provided by the acquirer to PayNet.			
consentEndToEndId	String	Max length: 35	Required
